REPORT of the FOREST FIRE WARDEN and DISTRICT CHIEF

LEST WE FORGET — IT CAN HAPPEN HERE

Disastrous forest and brush fires that destroy hundreds of homes are more prevalent on the west coast with their dry seasons and strong, dry, hot winds but 25 years ago this fall is the anniversary of a disaster that devastated large areas of northern New England leaving villages in ashes with rows of cellarholes and chimneys in a number of summer vacation home locations. Many lives were lost on that destructive day of October 23, 1947; nothing could stop the wind driven flames.

It is true that such conditions are unusual for New Hampshire but they happened once, they can happen again. The fuel for fires is all around us. All it takes is a firebrand. Only by cultivating a habit of carefulness with fire at all times can we meet the challenge of protection when dry conditions prevail. Please let these reminders be your guide:

1. Never, either when walking, riding or driving, discard a firebrand—a lighted match or a glowing cigarette.
2. Always obtain a permit for any outside burning. The burning of household rubbish is not permitted if your town has rubbish collection. Burning of grass or garden litter can be dangerous. See your warden first.
3. If you camp or picnic be sure open fires are allowed and if they are, put them **dead out** when leaving.
4. **Most Important**—instruct your children in the danger of the lighted match. A lighted match and dry grass or forest litter is a dangerous combination which leads to destructive loss and can lead to tragedy.

The past year—1971 was a favorable year for the control of fires. There were too many fire starts in some towns. We thank those who remembered to ask others to heed Smokey's message.

Number of fires reported and acres burned—1971 season:
